OVERVIEW

Learn all about the Leadership in Energy & Environmental Design (LEED) certification and jumpstart your career in green building by earning the LEED Green Associate credential! The LEED Green Associate credential is for the introductory-level professional who wants to gain a general understanding of all the LEED green building rating systems.

The Leadership in Energy & Environmental Design (LEED) Green Associate program is designed to educate candidates on the cutting edge green building and sustainable design practices, and enables participants to designate that expertise with an internationally recognized professional credential.

OBJECTIVES

In this program, you will learn green building and sustainable design principles, specifically as they relate to USGBC’s LEED green building rating system. This program will prepare you to pass the LEED Green Associate exam and is the first step in becoming a LEED professional. The exam fee is included in this program.

Upon completion of this program you will:

- Understand LEED & the process of getting a building LEED certified.
- Learn what is expected of a LEED Green Associate.
- Know what material to study to prepare for the LEED Green Associate Exam administered by USGBC.
- Be prepared to contribute to the health, safety, well-being, and productivity of the community at large by implementing best practices as it relates to sustainable design.

PROGRAM OUTLINE:
Leadership in Energy and Environmental Design (LEED)

INSTRUCTOR BIO

Jean Cipriano has been the principal of her own firm for over 25 years and has consulted on projects for major corporations and universities. She infuses her work with awareness and regard for the environment and applies this philosophy to the inhabitants of the buildings she designs. As a LEED AP, she has instructed adults in all aspects of interior architecture. Cipriano holds a bachelor’s degree in Interior Architecture and is a member of ASID.

OUTLINE

Module 1: Introduction to Sustainability

Module 2: Integrative Strategies

Module 3: Introduction to LEED

Module 4: Location and Transportation

Module 5: Sustainable Sites

Module 6: Water Efficiency

Module 7: Energy and Atmosphere

Module 8: Materials and Resources

Module 10: Indoor Environmental Quality

Module 11: Project Surroundings and Public Outreach

Module 12: Exam Tips and Logistics
Leadership in Energy and Environmental Design
